EDUCATION

B.A. Computer Science & Statistics | Macalester College

Saint Paul, MN • Expected May 2029

GPA: 3.5

Relevant Coursework: Core Concepts in CS (Python), Object-Oriented Programming & Abstraction, Intro to Statistical Modeling, Discrete Mathematics, Applied Multivariate Calculus

TECHNICAL SKILLS

Languages: Java, Python (NumPy, Pandas), R

Tools & Environments: Git/GitHub, PyCharm, VS Code, RStudio, Flask

Data & Statistics: Logistic & Linear Regression, Hypothesis Testing, Exploratory Data Analysis, Confusion Matrices

SOFT SKILLS

Leadership • Communication • Attention to Detail • Adaptability • Team Collaboration • Time Management • Problem-Solving

PROJECTS

Sudana — Community Social Networking Platform | Python • Flask • HTML/CSS

[GitHub](#)

- Built a full-stack social networking web app using Python and Flask, implementing end-to-end user authentication including sign-up, login, and password reset — demonstrating backend development and server-side logic skills
- Designed a mobile-style dashboard with a social feed, story circles, post composer, and bottom navigation bar, applying product thinking to translate a real-world app concept into working software
- Implemented server-side photo upload and permission memory system enabling dynamic profile picture updates — developed using AI-assisted development tools to accelerate architecture decisions and ship features efficiently

The Scrambled — Multiplayer Word Game | Python • Tkinter

[GitHub](#)

- Built a 2–5 player Python game with Tkinter, delivering a fully functional multiplayer experience with randomized word selection, live score tracking, and modular architecture across 4 components
- Identified and resolved a shuffle edge case for short words by restricting the word bank to 6+ letter entries, demonstrating attention to edge cases and commitment to reliable user experience

Minesweeper-Inspired Grid Game | Java • OOP • Event Handling

[GitHub](#)

- Developed an interactive Java grid game applying OOP principles including encapsulation and modular class structure, reinforcing scalable software architecture practices
- Collaborated with 2+ teammates using Git and GitHub to coordinate feature development and resolve merge conflicts, gaining hands-on experience with version control in a team environment

WORK EXPERIENCE

AI Fellow | Mercor (Contract)

Remote • Jul 2026 – Present

- Evaluated AI-generated content for accuracy and consistency with project guidelines
- Conducted quality-assurance reviews, identifying errors and visual mismatches
- Provided structured feedback to enhance model improvement while ensuring data privacy
- Contributed to confidential AI projects, maintaining high standards of attention to detail

Campus Center Manager | Macalester College

Saint Paul, MN • Sep 2025 – Present

- Oversee daily operations of a high-traffic campus facility, developing organizational and stakeholder management skills applicable to fast-paced tech environments
- Proactively identified and reported maintenance and safety issues, reducing incident response time by 10% — demonstrating a systems-thinking mindset and attention to operational efficiency

Hannaford To Go Shopper | Hannaford Supermarket

Brattleboro, VT • Mar 2025 – Aug 2025

- Fulfilled online grocery orders for up to 5 simultaneous customers with high accuracy, developing attention to detail and parallel task management critical in data and engineering workflows
- Optimized personal routing through store aisles to cut average shopping time by 15%, applying process improvement thinking to a high-volume production environment

Teaching Assistant | Jesuit Refugee Service

Kakuma, Kenya • Mar 2023 – Dec 2024

- Supported instruction for 60+ students across core subjects; led tutoring sessions for groups of 10, using data-informed feedback to identify knowledge gaps and improve academic outcomes
- Mentored 40 students as Peace Club leader, building leadership, conflict resolution, and team coordination experience across a diverse, multilingual community
