Ngina Awan

Computer Science & Statistics Student at Macalester College |
Aspiring AI/ML Engineer | Software Developer
Greater Minneapolis-St. Paul Area

Summary

Computer Science and Statistics student at Macalester College passionate about software engineering, machine learning, and AI-powered products. Currently developing Sudana, a social networking platform focused on community engagement, communication, and meaningful connections. Experienced in building projects with Python and data analysis tools, with growing interests in full-stack development, machine learning, fintech, and intelligent systems. Driven by a commitment to continuous learning and using technology to create impactful solutions.

Experience

Mercor

AI Fellow

July 2026 - Present (1 month)

- Evaluated AI-generated content for accuracy and consistency with project guidelines.
- Conducted quality-assurance reviews, identifying errors and visual mismatches.
- Provided structured feedback to enhance model improvement while ensuring data privacy.
- Contributed to confidential AI projects, maintaining high standards of attention to detail.

Macalester College

Campus Center Manager

September 2025 - Present (11 months)

St Paul, MN

- Managed daily operations of the campus center, ensuring a safe and inclusive environment for all users.
- Provided customer service by assisting students and staff with event support and inquiries.

- Coordinated with various campus partners to facilitate smooth event execution and adherence to policies.

Handshake

AI Fellow

June 2026 - July 2026 (2 months)

- Conducted quality assurance for large language models (LLMs), ensuring prompt accuracy and naturalness.
- Evaluated AI outputs against established criteria to enhance data annotation processes.
- Authored detailed justifications for prompts, contributing to the overall quality of AI training datasets.

Handshake

AI Data Annotator

December 2025 - February 2026 (3 months)

- Developed and evaluated domain-specific prompts to assess the performance of large language models (LLMs).
- Analyzed LLM outputs for scientific accuracy, clarity, and depth in specialized subfields.
- Conducted independent research to support prompt development and evaluation tasks.
- Contributed to enhancing AI's understanding of complex programming topics through expert review and feedback.

Macy's

Seasonal Fulfillment and Support Associate

November 2025 - January 2026 (3 months)

Bloomington, MN

- Supported high-volume retail operations at Macy's as a Seasonal Fulfillment and Support Associate.
- Picked, packed, and processed customer orders accurately to meet fulfillment deadlines.
- Provided exceptional customer service, assisting with inquiries and ensuring a clean shopping environment.
- Collaborated with team members to effectively manage peak-season demand and maintain operational efficiency.

Hannaford Supermarkets

Hannaford To Go Shopper

March 2025 - August 2025 (6 months)

Brattleboro, Vermont, United States

- Selected, packed, and prepared customer grocery orders with a focus on accuracy and quality.
- Navigated the store efficiently to meet productivity goals in a fast-paced environment.
- Provided professional customer service during order handoff, ensuring a positive shopping experience.

Jesuit Refugee Service

Incentive Staff

March 2023 - December 2024 (1 year 10 months)

Kakuma, Kenya

- Supported academic instruction by teaching English Language, Literature, and Mathematics with a focus on learner-centered approaches.
- Mentored students as Peace Club Patron, promoting conflict resolution and leadership skills.
- Organized inter-school sports competitions, fostering teamwork and community relations among students.
